Ss place their counters on **Start** and throw the dice. The player with the highest number begins the game. Depending on the square they land on, the S has to say what conditional it is and then finish the sentence. If the answer is correct, they can stay on the square. If not, they have to go back to the square they were before. The winner is the S who has earned most points.

1st conditional = 1 point

2nd conditional = 2 points

3rd conditional = 3 points

wish = 4 points

any or 0 conditional = 5 points

add extra (2) points for the S who is first to reach **Finish**
